

#### 10.0.2.0 WorkforceROI Project Accounting:

- Additional integration to Dynamics GP Purchase Order Processing including requisition entry and purchase order by project inquiry.
- Dual WIP accounts to specify one General Ledger posting account for cost transactions and one General Ledger posting account for sales transactions.
- Additional user-defined fields added for projects.
- Enhancements to the Master Shipment Posting Log.

#### 10.0.2.0 WorkforceROI Xpede.NET:

- Timesheet templates by day of week.
- Ability to print historical timesheets and expense claims.
- Option to restrict project reports by project manager.
- Delete icon verification.
- Enhancements to the Cost Transaction and Resource Utilization Reports.

In addition to these feature enhancements, this release also includes problem report fixes. Please refer to the release notes and the incident list for more details.
